

1. Main board + sensor board

Stackable boards that are easily mounted on plastic bosses.

2. PM sensor

Particle meter sensor that detects and counts PM2.5 and PM10 particles in surrounding area.
Easily mounted on plastic bosses.

Double-sided tape recommended in cases of unprecise 3D printing.

3. Battery

1500mAh battery that fits into the space provided. Double-sided tape recommended to make sure battery does not move inside of the enclosure.
